PROFESSIONAL SUMMARY

Site Reliability Engineer with **4+ years of experience** designing, automating, and operating **cloud-native platforms on Azure and AWS**. Strong expertise in **Azure Kubernetes Service (AKS)**, **Kubernetes**, **Docker**, **Terraform**, **Helm**, **Azure DevOps**, **Jenkins**, **GitHub Actions**, **Linux**, **Python**, **Datadog**, **Prometheus**, **Grafana**, **PostgreSQL**, **Redis**, and **Infrastructure as Code (IaC)**. Proven experience supporting **enterprise-scale production systems**, improving deployment reliability, observability, incident response, and platform scalability for distributed microservices environments.

CORE SKILLS

Cloud & Platform: Azure, AWS, Azure Kubernetes Service (AKS), Kubernetes, Docker, Helm

DevOps & Automation: Terraform, Ansible, Azure DevOps, Jenkins, GitHub Actions, **CI/CD**, Infrastructure as Code (IaC)

Monitoring & Observability: Datadog, Prometheus, Grafana, ELK, Azure Monitor

Programming & Systems: Python, Bash, Java, Linux, Git, GitHub

Databases & Messaging: PostgreSQL, Redis, Kafka, Azure Event Hub

Security & Reliability: Azure Key Vault, RBAC, Workload Identity, **Incident Management**, Root Cause Analysis (RCA), SLO/SLI, Microservices

PROFESSIONAL EXPERIENCE

Harman International (Client: Mercedes-Benz) — Site Reliability Engineer

Jan 2026 – Aug 2026

Bengaluru

- Managed **production Azure Kubernetes Service (AKS) clusters** supporting Mercedes-Benz Personalization services across **EMEA, AMAP, and China** regions.
- Automated provisioning of **AKS, PostgreSQL, Redis, Azure Event Hub, and Azure Key Vault** using reusable **Terraform modules**, improving infrastructure consistency across environments.
- Optimized **Azure DevOps CI/CD pipelines** with **Helm-based Kubernetes deployment strategies**, reducing deployment time and increasing release reliability.
- Built **Datadog dashboards, monitors, and SLO-based alerting** for critical microservices, reducing incident detection time and improving **MTTR** during production outages.
- Performed **production troubleshooting, log analysis, Kubernetes diagnostics, and root cause analysis (RCA)** for high-priority platform incidents.
- Improved platform security through **RBAC, Workload Identity, and Kubernetes hardening**, enhancing operational resilience and compliance.

Exotel — Site Reliability Engineer

Jul 2025 – Jan 2026

Bengaluru

- Developed and maintained **Jenkins-based CI/CD pipelines** and Git-driven deployment workflows for production applications.
- Automated cloud infrastructure using **Terraform** and Ansible following Infrastructure as Code best practices.
- Implemented **Prometheus, Grafana, and ELK monitoring solutions** with proactive alerting and performance optimization.
- Supported **Docker and Kubernetes** workloads on **Linux** environments, improving deployment reliability and operational stability.
- Collaborated with development teams to streamline release automation and platform scalability.

HCL Technologies — Azure DevOps Engineer

Sep 2022 – Jun 2025

Bengaluru

- Designed enterprise CI/CD pipelines using **Azure DevOps, Jenkins, and GitHub Actions** across multiple environments.
- Managed **Docker and Kubernetes (AKS) deployments** using Helm charts and reusable Infrastructure as Code modules.
- Developed **Python** and Bash automation scripts for deployment workflows, environment provisioning, and operational efficiency.
- Implemented monitoring with **Prometheus, Grafana, and Azure Monitor**, improving release engineering and production visibility.
- Worked closely with development and operations teams to automate infrastructure provisioning and deployment processes.

EDUCATION

Bachelor of Engineering (Computer Science)

2022 | 81%

VTU, Karnataka

CERTIFICATIONS

- Microsoft Azure AZ-900
- Microsoft Azure AZ-104
- AWS SysOps Administrator
- ACS Skills Assessment
- Certified Kubernetes Administrator (CKA) — In Progress
